MILWAUKEE POLICE DEPARTMENTANNUAL REPORT FOR 1947

An analysis of crime statistics for the City of Milwaukee for the year 1947 is given as follows:

There were 14 murders during 1947, compared with 4 during 1946. However, the homicide rate in Milwaukee is far below that of other large cities in the United States.

Other criminal offenses reported to the police were as follows: Rape--15 in 1947 as compared to 29 in 1946; Robbery--85 in 1947 as compared to 75 in 1946; Aggravated Assault--84 in 1947 as compared to 107 in 1946; Burglary--652 in 1947 as compared to 811 in 1946; Larceny--(\$50 and over)--822 in 1947 as compared to 858 in 1946; Larceny--(under \$50)--3,586 in 1947 as compared to 3,797 in 1946; Auto Theft--601 in 1947 as compared to 1,045 in 1946. The recoveries of automobile thefts continue to be highly satisfactory--99 per cent of the cars stolen.

In spite of the great increase in motor vehicle registrations, only a total of 601 automobiles were stolen during the year 1947. The decrease of stolen cars in the City of Milwaukee has been so great that the Director of the Federal Bureau of Investigation questioned our report.

We believe that this decrease is due largely to the program instituted by this Department late in 1946, whereby the Chief has forcefully brought to the attention of the public, the dangers involved in leaving ignition keys in parked cars. The Milwaukee Metropolitan Crime Prevention Commission and the press has fully cooperated in this worthwhile program. The Department adopted a new policy of coping with this problem and issued orders to all of its members that whenever they see an automobile parked on the streets with the key in the ignition switch, the officer leaves a "tag" in the automobile. This tag is merely a notice that the motorist left his key in the ignition switch. It contains information and statistics showing the large percentage of juveniles involved in such car thefts and impressing upon the motorists that they are "encouraging juvenile delinquency when leaving the key in a parked car".

Since this method has been inaugurated, 6716 tags have been issued to careless motorists leaving keys in the ignition switch during the year 1947. In addition, numerous insurance companies and insurance automobile underwriters have aided in this program by mailing a similar warning to all of their customers.

Juvenile detentions by this Department have shown a decrease for the fourth successive year--there being 3,790 for 1947 as compared with 4,461 for 1946; 6,302 for 1945; 6,501 for 1944 and 7,106 for 1943. The Milwaukee Police Department again enjoys the distinction of being among the large metropolitan city police departments in the nation to decrease its juvenile arrests in 1947.

During the year 1947, the Bureau of Identification was called upon to assist members in solving 28 difficult cases involving "inside" thefts reported in offices and stores in which the thief continued to operate successfully despite the employment of usual methods to effect his apprehension. In every instance, through the use of staining and fluorescent powders, the thief either was apprehended or the thefts stopped.

Frequently, during the past year the Bureau was called upon to obtain tiny identifying jewelers' scratch marks on rings, wrist watches, and other objects, and in every instance the numbers were read by the use of the binocular microscope. Ultra-violet light machines were used on many occasions to read faint and illegible writings and to detect changes made in documents, identification cards, etc.

There were 5,814 intercity messages transmitted and 7,773 intercity messages received by the Radio Bureau.

YOUTH AID BUREAU

The Department attributes the decrease in juvenile delinquency to the new system adopted in 1946, wherein each and every member of the Police Department is trained and made to understand that the juvenile problem is the problem of the individual police officer. Each officer is instructed to assume an intelligent, understanding, and sympathetic attitude and to treat the pre-delinquent child in this manner. Therefore, all members of the Department are virtually juvenile crime prevention agents.

The Youth Aid Bureau serves as a nucleus and a clearing house for all referrals made to the Bureau of those juveniles that the individual police officer has difficulty in rehabilitating. The Youth Aid Bureau received a total of 2,459 referrals from the seven district police stations, traffic bureau, and detective bureau. Referrals received from department stores, schools, theatres, railroad companies and parents are also included in this total. A supplementary case history on regular form is made for each referral received. A continuous record is kept on this form of all interviews, contacts, and investigations. Previous arrests are also listed designating time, place, and type of offense.

Members assigned to duty in the Bureau made 3,757 personal contacts regarding referred juveniles. These contacts included interviews with the child, parents, school, and the probation department.

A total of 906 investigations were made on complaints received from schools, churches, civic and fraternal groups, theatres, sweet shops, citizens, etc. Vandalism, disorderly conduct, destruction of property, minors loitering or drinking in taverns, and minor larcenies were the chief cause of complaint. The more serious charges involved sex offenses, runaways, contributing to the delinquency of a minor by an adult and promiscuous neglect of children on the part of parents or guardians.

Members assigned to the Bureau made 2,311 institutional contacts and inspections during the year. These included visits to youth centers, social centers, clubs, taverns, soda fountains, sweet shops, restaurants, roller skating rinks, meeting halls, theatres, after-school assemblies, athletic events, etc. These inspections are routine daily activities for the members of the Bureau and are not a part of the investigations made on complaint from such sources.

Leading the list of special activities of this Bureau is the Police Athletic League usually referred to as "PALS". The "PAL" program is not restricted to the pre-delinquent youths--but is available to all children--stressing character developing activities. The success of this type of crime prevention program can be illustrated vividly by noting the effectiveness of the PALS baseball program. Sponsored by individuals and business concerns, 28 teams were kept busy playing baseball during the entire vacation period. Most of these teams were organized from natural groups and neighborhood gangs.

One of the Police Departments best weapons in combating juvenile delinquency is the splendid working relationship that has been established between the police and the youth of the city. Through this close contact with police, the youths realize--some for the first time--that a policeman is their friend. It tends to instill in the minds of boys and girls respect and affection, rather than fear and mistrust for the representatives of law and order.
